

# Daniel Mongeote Tlachy

[contactdanielmongeote@gmail.com](mailto:contactdanielmongeote@gmail.com) || <https://github.com/danieltlachy> || <https://www.linkedin.com/in/daniel-tlachy/> || Xalapa, Veracruz

*Software Engineering student with foundation and practical experience gained through academic and personal projects, motivated by continuous learning, software quality, and exploring new technologies.*

## **Education:**

---

**Universidad Veracruzana, Xalapa-Enríquez, Veracruz, México**

**Aug 2021 – In progress**

- **Bachelor's degree:** Software Engineering

**Centro de Bachillerato Tecnológico Industrial y de Servicios 165 “Leona Vicario”, Coatepec, Veracruz, México**

**Ago 2018 – Jun 2021**

- **Specialization:** Electronics

## **Technical Skills:**

---

- **Programming Languages and Frameworks:** C++, C#, Java, JavaScript, Kotlin, HTML, CSS, .NET, WPF, WCF, Node.js, Express.js, Astro, Vainilla.js, TailwindCSS.
- **Databases:** MySQL, SQL Server, MongoDB, Google Firestore.
- **Tools:** Git, Figma, WordPress, Jira, Trello, Slack, Docker, Jenkins, Apache, Nginx, Vagrant, Postman, Swagger, Selenium, Microsoft Office suite.

## **Relevant Activities:**

---

**Academic Internship Delfín Program | Virtual | Cúcuta, Norte de Santander, Colombia**

**Jun 2025 – Aug 2025**

- Collaborated on the design and modeling of a web application for digital security risk management targeting public and private companies, applying ISO/IEC 27005 and NIST standards, improving threat traceability in a collaborative academic environment.
- Presented project results as a speaker at the XX X Congreso Internacional del Verano de la Investigación Científica y Tecnológica del Pacífico.

**Academic Internship Delfín Program | On-site | Ciudad Serdán, Puebla, México**

**Jun 2024 - Aug 2024**

- Contributed to the development of a mobile application for an Academic Geointelligence System, integrating student tracking functionalities to visualize academic routes and progress in real time.
- Presented project results as a speaker at the XXIX Congreso Internacional del Verano de la Investigación Científica y Tecnológica del Pacífico.

## **Relevant Technical Experience:**

---

**Hangman Desktop Application (C# / WPF / WCF/ SQL Server)**

**Feb 2025 – Jun 2025**

- Designed and developed a "Hangman" game with a Client-Server architecture, achieving real-time communication using TCP/IP sockets and asynchronous callbacks.
- Used Entity Framework for efficient data management, reducing connection and logic errors during system testing.

**Wang: Inmuebles a tu alcance – WebApplication**

(Node.js / HTML5 / CSS3 / SQL Server)

**Feb 2025 – Jun 2025**

- Implemented a real estate web system with a REST API, automating property and user management to improve process efficiency.
- Tested API endpoints with Postman, verifying inputs and expected responses using JSON format.
- Deployed the database on the SOME platform and integrated accessibility guidelines such as WCAG 2.4.7 (Focus Visible), WCAG 1.4.3 (Minimum Contrast), and WCAG 1.4.4 (Resize Text), ensuring an inclusive and accessible user experience.

### **Italia Pizza System – Desktop Application (C# / MySQL Workbench)**

**Aug 2024 – Feb 2025**

- Built an order, inventory, and user management system (suppliers, cooks, waiters, manager) for a fictional pizzeria, reducing simulated service times through automated processes.
- Applied the MVC (Model-View-Controller) design pattern, separating the application into respective layers, and used the WPF (Windows Presentation Foundation) framework for user interface design and visualization.

### **Golf Clothing System – Desktop and Mobile (C# / Node.js / Kotlin / Firestore)**

**Aug 2024 – Feb 2025**

- Designed and developed an e-commerce system focused on selling clothing (t-shirts, hoodies, jackets) and accessories (watches, art toys, wallets, glasses), inspired by the online store golfwang.com, and integrated a REST API using Node.js, testing endpoints with Postman to verify inputs and expected responses.
- For the mobile application, deployed the database on Google Firebase using Firestore; for the desktop application, deployed the database on the SOMEER platform using a MySQL Workbench connection.

### **Final V&V Document for the HealthDivine System - Capstone Project**

**Aug 2024 – Feb 2025**

- Applied the IEEE Std 1012-2016 standard in technical reviews and walkthroughs across all project phases.
- Automated functional testing with Selenium to validate forms.
- Identified and documented over 25 inconsistencies in the system's design and coding, aiming to improve overall product quality.

### **Blockbuster – Web Application (Node.js / MongoDB)**

**Feb 2024 – Jun 2024**

- Designed and developed a movie management system, integrating a REST API with Node.js, applying basic security and encryption principles, improving the protection of key Endpoints against penetration testing.

### **Additional Information:**

---

- **Languages:** Spanish (Native), English (Intermediate B1)
- **Soft Skills:** Teamwork, technical communication, adaptability, self-directed learning
- **Methodologies:** Scrum, Waterfall, ICONIX, WAE
- **Interests:** Software quality assurance, automated testing, web and mobile application development, applied cybersecurity, process automation, and continuous improvement through collaborative methodologies and project management tools
